

AT the client side:

```
/Downloads/network lab/UDP_Echo$ gcc udpclient.c -o c
```

```
/Downloads/network lab/UDP_Echo$ ./c
```

```
usage: udpcli<IP address>
```

```
/Downloads/network lab/UDP_Echo$ ./c 127.0.0.1
```

```
Hello
```

```
Hello
```

At the server side:

```
/Downloads/network lab/UDP_Echo$ gcc udpserver.c -o s
```

```
/Downloads/network lab/UDP_Echo$ ./s
```

```
Received the following:
```

```
Hello
```
